SUMMARY

UX Engineer with **1 year of experience**, **Google UX Certification**, and a **Full-stack (Front-end focus)** background. I bridge **design** and **development**—using **Figma** for design and **HTML**, **CSS**, **React**, **Next.js**, **TypeScript, API, Testing, Prisma and Git/Github** to turn complex needs into intuitive, high-impact interfaces.

WORK EXPERIENCE

UX Engineer

Gaahleri, Ningbo, China — *Aug 2025 – Present*

- Lead **UX | UI design** and **frontend development** for **Shopify e-commerce**—owning **design systems**, **reusable components**, and **cross-functional collaboration**; drive **product launches**, **holiday campaigns**, and **promotional pages** with **custom CSS** and **responsive UI**.
- Built **Kaledio Color Lab** (**0-to-1 full-stack platform**)—**end-to-end UX design** (**Figma**, **User Research**, **Wireframe**, **Prototyping**, **Cross-device**), type-safe **frontend** (**Next.js**, **TypeScript**), and **backend (Prisma**, **Clerk Auth)** with BI dashboards to deliver data-driven insights for marketing.
- Launched **Aventus Brushes** (high-ticket customization)—designed a **5-stage configurator with real-time preview**, reducing bounce rates through streamlined UX; engineered **custom CSS** for cross-device consistency, **driving $362K revenue in first month**.
- **Collaborate closely with product managers and back-end engineers** to align user needs with **business goals** and **technical constraints**.

Customer Experience Team Member

*ATG Entertainment, **London, UK*** — *Oct 2023 – Jul 2025*

- Engaged directly with a **diverse customer** base, developing deep **empathy for user pain points** and expectations across multiple touchpoints.
- **Analysed customer feedback data**, **presenting actionable insights to the product team** that informed feature prioritisation.
- **Collaborated in a 50-member international team using English** to coordinate daily operations and ensure seamless cross-cultural communication.
